Attachments: image001.png

Dear Mr. Middleton:

NMOCD requests that a complete delineation occur at L7, which is in a drill pit. Therefore, this incident 1RP-4574 remains open. NMOCD's position is that any spill, which occurred over an existing pit, must be delineated and remediated.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: RE: Closure approval request BARR NONE FEDERAL #1, 1RP-4574

Dear Mr. Middleton:

I have reviewed the closure report for 1RP-4574 although the delineation workplan was not approved beforehand. The report indicated that bottom and sidewall confirmation samples were taken before backfilling. Were the samples sent to a laboratory for analyses? Of particular concern is L7. Please inspect the liner. The Responsible Party needs to provide NMOCD with a concise report of the inspection with affirmation the liner has and will continue to contain liquids.

Thanks,

Olivia Yu
