Subject: RE: 1RP 4858 - State No. 30,-1 Lea Co., NM,
Date: Thursday, June 7, 2018 8:11:30 AM

Gentlemen:

Please find attached a photograph setting out the limit of the polymer liner located near and around the open top fiberglass water tank at the above Re leasehold. The soil covering the liner (at this immediate location) is less than five (5) inches thick. Further exposure of the same by backhoe may result in compromising its integrity. I request no further liner delineation be required.

The open top fiberglass water tank has been empty of liquids and solids. Today the lease crew will be relocating it to an appropriate area near the crude oil production tanks. As previously mentioned, should the tank's structural integrity not withstand this undertaking, the same will be replaced.

Best Regards,

Gregory B. Gregson

Mr. Gregson:

Thank you for the photo. As mentioned below, NMOCD requires photos of the entire liner in the facility, including documentation of the liner in relation to the release area, for evaluation of liner integrity and to assess whether additional delineation will be required for IRP-4858.

Thanks,
Olivia

Subject: RE: IRP 4858 - State No. 30,-1 Lea Co., NM,

Good morning Mr. Gregson:

Thank you for the map with the sample locations demarcated and GPS coordinates of sample locations for IRP-4858.

If the entire facility is lined, NMOCD requires a statement of liner integrity and photo documentation of the intact liner during installation. If photos are not available, please inform NMOCD at least 2 workdays in advance of activities to remove impacted material on top of the liner.

If the facility is only partially under the leaking tank, then additional delineation will be required. Specifically, these areas: center, represented by sample location 5 & 6, and the Southeast corner (sample locations 11-13). Samples from 0.5 ft. bgs exceed permissible chlorides of 600 mg/kg at SP 5, 6, 11 & 13 and permissible TPH extended of 1000 mg/kg at SP 11 & 12.

NMSLO may have additional concerns or stipulations.

Thanks,
Olivia

Good morning Mr. Gregson:

No. The map marked with Sample Locations was not previously submitted. As this release occurred on State surface and mineral ownership, please be advised that NMSLO must be included in all email communications and submittals.

Thanks,
Olivia

Dear Ms. Yu:

Perhaps I did not provide you this map setting out the thirteen sample station (on February 8, 2018) for the above Re cleanup. The table containing the location of these samples will be forthcoming. I apologize for my oversight.

Best wishes,

Gregory B. Gregson
