Mr. Porter/Mr. Passmore:

NMOCD appreciates your timely response to address this release. NMOCD approves of the delineation and remediation completed for 1RP-5012. Backfill approval is granted. Please be advised for future reference, any change in gradient of excavation depth (e.g., between 32" and 36" excavation depths) must have a confirmatory edge/sidewall sample taken.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

NMSLO approves backfilling the site based on the provided data. Concurrence from NMOCD is also required. Also, if no revegetation is going to be performed then please submit photographs of the release in the pasture area to document the vegetation isn't impacted for closure. Let me know if you have any questions.

Thanks

Subject: 1RP-5012 Marshall & Winston

Good morning Olivia and Ryan,

I am submitting the attached confirmation soil analysis and related information for the spill off of Marshall & Winston's Klein 16 State #2H. We are seeking your approval to go ahead with the backfilling and close-out of this spill. Please let me know if you need anything else regarding this project.

Thank you!
Paul Porter
