The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local

laws/regulations.

Mr. Hitchcock:

NMOCD approves of the delineation completed for 1RP-4811 and proposed remediation with these conditions:

1. For the area represented by T-2 with a 1 ft. proposed excavation, laboratory analyses (TPH extended and chlorides) of confirmation bottom and edge samples required.
2. On an appropriately scaled map 1) outline and annotate the areas with 6-inches and 1 ft. excavations, and 2) mark confirmation sample locations with GPS coordinates.
3. Photo documentation of delineation and remediation activities.

Please confirm or inform for clarification.

Like approval from BLM required.

Thanks,

Olivia Yu
