Olivia,

Just reviewing the 1RP-5076 below. Caza should not have listed this as the Slick Mesa pipeline, they have their own line in this area. This should be listed under their Gamma 8817 JV-P lease not our Slick Mesa Lease. They should be responsible for part of the release in the fire impacted area. As we talked about earlier our line was out of service during the fire, the volume of our release is minimal. Once I hear back from Caza we will decide how to split cost, but we will proceed with delineation for now.

Thank you,

Todd Passmore  
Marshall & Winston Inc.

Mr. Passmore:

Please verify. If Marshall & Winston is the Responsible Operator, please inform NMOCD and NMSLO of the environmental consultant conducting the delineation or remediation.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good morning Mr. Morris:

Yes. The fire affecting the poly line for Caza is separate than the incident for Marshall & Winston. If otherwise, please provide photo documentation along with an initial C-141 with the estimated release volume.

Thanks,  
Olivia

Olivia

There was a fire at the Slick Mesa State 17-1H (30-025-30587). The fire spread across a pasture and burned one of Caza's poly line's. Marshall and Winston Inc filed a C-141 which I have attached. Does Caza need to file a C-141 as well? Thanks for your help with this.
