Dear Mr. Thielke:

NMOCD approves of the delineation completed for 1RP-3327 and agrees that no remediation is required. NMOCD grants closure. Please be advised to include NMSLO in all communications and report submittals.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-3327** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from NMSLO required.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Dear Ms. Yu,

I hope you had a great weekend! Larson & Associates, Inc. (LAI), on behalf of Legacy Reserves Operating, LP (Legacy) submitted a delineation report for the 1RP-3327 on March 21, 2018. I was just wondering if you could give me an update on the status of that report. Please give myself or Mark Larson a call if you have any questions.

Respectfully,
