Good morning Mr. Middleton:

Notes:

- Please remember to include NMSLO in all communications and report submittals. 1RP-4670 is on State surface and mineral ownerships. The email from October 16, 2017 explicitly mentioned this.
- For future reports, please check USGS database for depth to groundwater estimation in addition to NMOSE. Although the depth to groundwater is still estimated to be > 100 ft. bgs, the USGS wells in the vicinity have more recent data than NMOSE.

The closure report for 1RP-4670 is DENIED. Please refer to the email dated October 18, 2018 for stipulations to the approved proposed delineation/remediation plan.

NMSLO may have additional remediation concerns along with any reclamation requirements.

Thanks,
Olivia
