**Subject:** proposed additional monitoring wells for Chevron NM E State NCT : 1RP-4239  
**Date:** Wednesday, July 25, 2018 2:51:00 PM  
**Attachments:** approved\_NM E State NCT-1 007 (1RP-4239).pdf

---

Dear Messrs. Foord and Michelson:

NMOCD approves of the release characterization/delineation completed thus far for 1RP-4239. The proposed locations and conditions of the additional groundwater monitoring wells are also approved pending NMOCD Hydrologist agreement. Mr. Billings may have concerns or stipulations.

NMSLO concurrence required.

Please note that soil temperatures for samples, submitted on November 17, 2017, were above standard sampling protocols.

Thanks,

Olivia Yu  
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
