By Olivia Yu at 10:53 am, Jul 25, 2018

If a Watercourse was Impacted, Describe Fully.* N/A

Describe Cause of Problem and Remedial Action Taken.*
Operator arrived on location and found that the enardo valve on top of the water tank was on fire. The Operator immediately shut-in all four wells that go into the facility.

Describe Area Affected and Cleanup Action Taken.*
The Operator watched the small fire from a safe distance offsite. The fire was extinguished by the fire department. There was no spill or ground disturbance associated with this fire.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
