---

Mr. Green:

NMOCD is in concurrence with NMSLO. The proposed additional delineation, while conducting remedial activities, for 1RP-4950 is approved with these clarifications:

- Bottom and sidewall/edge samples for each depth of excavation.
- Lateral extension of the release area must be clearly outlined on a scaled map in relation to the original footprint. Mark confirmation sample locations with GPS coordinates.
- Dated photo documentation of the delineation/remediation process.

Thanks,  
Olivia

NMSLO will approve the plan although vertical delineation isn't completed. As noted, confirmation sample are required on the bottom/sidewall on all excavations to ensure all impacted material is removed. Samples should be taken no more than 50 feet apart. Approval from NMOCD is also necessary.

Ms. Yu / Mr. Mann,

Good afternoon, please find attached the Soil Investigation Summary and Proposed Remediation Workplan for the Redtail State COM # 001H Release (1RP-4950) for your review and approval. Please let me know if you have any questions. Thanks and have a good day.

Regards,

**Matthew Green, P.G.**

President
