Attachments: approved_1RP5091_7.10.18 corrective action plan submittal.pdf

Good morning Mr. Leking:

NMOCD approves of the delineation completed for 1RP-5091 and the proposed additional delineation/remediation plan. Due to the levels of TPH extended remaining in place between 4.5 and 5.5 ft. bgs for the TT-1 area, NMOCD requests that an additional foot of impacted soil be excavated and bottom confirmation samples taken rather than emplacement of a liner. Provide dated photo documentation of the remediation activities.

Please confirm or inform for clarification.

Like approval from NMSLO required. NMSLO may have additional concerns or stipulations.

Thanks,
Olivia
