Subject: RE: 1RP-5046 Closure
Date: Monday, July 30, 2018 9:18:00 AM

Good morning Ms. Karrigan:

Thank you. Please note that a final C-141, with the corrective actions noted, was not submitted in the closure report.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-5046** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Please see attached. This was taken yesterday and it had been raining in the area, so there are a few visible puddles.

Have a good weekend.

Callie
