Ms. Blaney:

Delineation is not completed for 1RP-4838. Please be advised that NMOCD does not consider an 'impermeable layer' as an acceptable rationale to not complete delineation. A release characterization plan is still required.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

CAUTION: This email was sent from an EXTERNAL source. Use caution when clicking links or opening attachments.

Dear Ms. Blaney:

The 1RP for this incident is

4838	10/6/2017	A	WPX/RKI	Toro 22-3	30-025- 35253	19S-35E- 22K	9/21/2017
-------------	-----------	---	---------	-----------	------------------	-----------------	-----------

Please note that a release characterization/delineation workplan as detailed in the attachment must be approved by NMOCD BEFORE any remediation work.

Thanks,

Olivia Yu

Subject: RE: WPX/RKI Toro 22-3 - initial spill notification

Good morning,

WPX had a spill this morning, 9/21/17 at 8:30 am, at the Toro 22-3 well pad; API 30-025-35253. The cause of this spill is equipment failure – corroded produced water tank. Approximately 120 bbls of produced water were spilled inside dirt SPCC containment. 110 bbls were recovered with a vac truck. The impacted surface will be scraped off as soon as the line locates are cleared. The C-141 report will be submitted to you in the next 15 days, however, please do not hesitate to call me if you have any questions or concerns.

Thank you and have a great day,

Karolina Blaney
