Ms. Yu,

I have corrected the C-141 to show that it is a poly flow line associated with the well and the affected pasture was in square feet. Sorry for the inconvenience. Thanks and have a good day.

Subject: [EXTERNAL] RE: Initial C-141

Dear Mr. Baker:

Please clarify. Which injection flowline was affected by a fire? The GPS coordinates of the release location are for the wellhead. Also, did the fire impact 15,000 square feet of the pasture or 15,000 feet in length as written.

The 1RP for this incident is

5155	8/10/2018	A	Apache	Warn State A/C 2 #9	30-025-03083	18S-35E-6M
-------------	-----------	---	--------	---------------------	--------------	------------

Please remember to include this 1RP identifier to all communications. Also, please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

All,

Please find the attached initial C-141 for the flowline hydrocarbon fire that occurred at the Warn State A/C 2 # 9 on July 30, 2018. Please let me know if you have any questions or wish to discuss. Thanks and have a good weekend.
