Attachments: approved_1RP5055_BM Marcus Battery Corrective Action Plan.pdf

Mr. Baker:

NMOCD will approve of the vertical delineation as completed and proposed remediation for 1RP-5055 with the following conditions:

1. Confirmation bottom and sidewall samples, no greater than 50 ft. apart, tested for chlorides, BTEX, and TPH extended. At least one sidewall/edge samples must be at the border between differing depths of excavation. For example, the edge between the area represented by SP-1 and SP-3.
2. Mark release point and demarcate the differing depths of excavation on a scaled map.
3. Dated photo documentation of the remedial activities and of the oil tank for verification.

Please be advised that the revised C-141 form must be used for submittal of remediation and closure report. <http://www.emnrd.state.nm.us/OCD/forms.html>

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
