Dear Mr. Thielke:

Revised NMAC 19.15.29 was effective on August 14, 2018.

<http://164.64.110.134/parts/title19/19.015.0029.html>

Delineate and remediate per regulation. Additionally, please be advised to use the revised C-141 form for available at: <http://www.emnrd.state.nm.us/OCD/forms.html>

Please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,

Christina Hernandez

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
