Subject: RE: Work Plan for Additional Soil Assessment - Former State K Tank Battery No. 3, Vacuum Oil Field, Lea County, New Mexico (NMOCD IRP No. 09-7-2239)

Mr. Purdy:

Notes

- All documents that you have previously sent to NMOCD has been uploaded to 1RP-2239. <http://ocdimage.emnrd.state.nm.us/imaging/AEOrderCriteria.aspx>
- Although no longer functional, there is a playa lake, which is a surface waterbody of New Mexico, approximately 500 ft. NE of the release location.

Thank you for your patience. NMOCD approves of the proposed additional release characterization for 1RP-2239. Please provide either on the soil bore logs or tabulated separately, the GPS coordinates of the soil bore locations.

Approval from NMSLO required. NMSLO may have additional concerns or stipulations.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

Olivia.yu@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
