NATURE OF RELEASE

Type of Release: Produced water	Volume of Release: 9.44 water (bbls)	Volume Recovered: 9 bbls
Source of Release: Corrosion on nipple (pinhole leak)	Date and Hour of Occurrence: 03/13/12 07:00 AM	Date and Hour of Discovery: 03/13/12 07:00 AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Geoffrey Leking - voicemail	
By Whom? Josie DeLeon	Date and Hour: 3/13/12	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

REVISED

10:33 am, Sep 26, 2018

If a Watercourse was Impacted, Describe Fully.\*  
No impact to watercourse.

Describe Cause of Problem and Remedial Action Taken.\*

Corrosion on nipple caused pinhole leak on injector inlet. Shut in well for repair.

Describe Area Affected and Cleanup Action Taken.\*

On discovery of the spill, contacted and recovered the standing fluids. Visually impacted soils in the area were excavated to a depth of approximately two feet bgs and sent off for disposal.

A four point composite confirmation soil sample was collected from the base of the excavation. These sampling results indicated a presence of chloride concentrations in shallow soils at levels of regulatory concern.

In response to the sampling results, an additional site assessment was conducted to confirm the extent of soil impacts.

Results of the additional assessment activities are provided in the attached report.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
