Mr. Rosine:

Please note the NMOCD databases indicate both surface and minerals ownerships are Federal. BLM and NMSLO can verify.

Please be advised that

1. The initial portion of the C-141 form does not include the calculations to determine the release volume. Visual estimation is not sufficient nor adequate. Please submit measurements in volume estimation; including dimensions, soil parameters (porosity, texture, bulk density, etc).
2. Dated, geo-referenced photo documentation for verification that the initial response activities have been employed to contain the release is requested.
3. The GPS coordinates provided must be of the release point. Unless the release was from the wellhead (e.g., stuffing box), do not use the wellhead latitude and longitude units.
4. Per 19.15.29.13 NMAC, regulations of corresponding agencies supersede NMOCD's.

The 1RP for this incident is

|-------------|-----------|---|-----------------|-----------------|--------------|-------------|-----------|

Please remember to include this 1RP identifier to all communications. Delineate and remediate per regulation. Mind the timelines for submittal of requisite information.

Please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

All,

Attached is the C-141 for the release that occurred on September 19<sup>th</sup>. This is for the initial notification and Justin will complete the form and return it to you. This is my first time filling out the new form so if there is anything you would like to see completed differently, please let me know.

Regards,

Cullen Rosine
