OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Christina, Olivia,

Please see the attached initial C141 for the release at the Dee Boot. Marathon performed an initial surface scrape as the depth was less than ¼". A picture of the affected area below as well as copy of the spill estimation. Can we submit a closure or should we go ahead and take samples?

Thank you,

Callie

Subject: Marathon Oil Company - 24 hour notice - Dee Boot 24-34-26 WXY 19H

Good afternoon,

During Completions operations on 10/18/2018 at 6:33 pm, the well was being reopened when the separator flooded causing the flare line to fill up with oil. Less than a gallon of fluid ignited a small fire as it exited the flare and made contact with the ground at the base of the flare. The well was immediately shut-in due to Flowback personnel being onsite. The small fire was extinguished by an onsite contractor.

A C141 will be submitted shortly.

Thank you,

Callie Karrigan
