(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The Queen Formation is an oil well operated by the Atlantic Richfield Company as the McClure "B" well no. 19. We propose the following:

- 1) Pull Queen and Drinkard rods and tubing.
2) Send tubing to be coated.
3) Run Drinkard tubing with Baker Model "D" Seal Assembly, Queen tubing with subsurface pumping equipment and rods.
4) Load annulus with inhibited Queen water from base of Queen perforations to packer-setting depth.
5) Return Queen to operator, Atlantic Richfield Company.
6) Hook Drinkard formation to Injection System and place well on Injection Status.

cc: Atlantic Richfield Company, P.O. Box 1978 Roswell, New Mexico 88201

18. I hereby certify that the foregoing is true and correct
