If a Watercourse was Impacted, Describe Fully.*
Not applicable.

APPROVED

By Olivia Yu at 10:13 am, Apr 18, 2018

Describe Cause of Problem and Remedial Action Taken.*

A high pressure event in the separator occurred, sending gas and fluids (condensate) to the flare. Less than two gallons of condensate was released out of the flare, igniting a small area adjacent to the pad. The area was 10'x5'. Due to a similar reoccurrence, the facility has been shut-in until a knock out pot can be installed to capture liquids in the flare line. Marathon installed equipment valves to automatically shut well in during high pressure events.

Describe Area Affected and Cleanup Action Taken.*

Contaminated soil was scraped and sent to R360 for disposal. Pictures of cleanup and knock out pots installed are below.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Dear Ms. Karrigan:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **nOY1804329900** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Marathon Oil Company - Beckham 19 1 Initial C141

Good afternoon,

Attached is the initial C141 for the fire reported on the Beckham on 1/29. This is a reoccurrence and impacted the same area. I included details on corrective actions taken to prevent reoccurrence: the installation of knockout pots and valves to automatically shut-in the well during a high pressure event. Please let me know if you have any questions.

Subject: 24 notification

Good afternoon,

On 1/29, Marathon received a notification from a neighboring operator that there was a small fire at

the Beckham 19 1 well site in Lea County. The fire was in a 5x5 area around the flare. The fire was extinguished. All wells have been shut-in until a knock out can be installed. A C141 will be submitted.

Please let me know if you have any questions.
