13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Legacy Reserves Operating LP requests BLM approval to permanently abandon the current open hole wellbore below the 9 5/8" intermediate casing at 5400' and temporarily abandon the well pending an evaluation of a possible sidetrack in the 9 5/8" casing at approximately 5370'. We propose setting a cement plug on top of the current 7" casing fish at 6034'. The cement plug is proposed to be 400 sacks of Class "C" cement containing 2% CaCl (1.32 CF/sx yield) which is designed to fill the entire 8 3/4" open hole interval from 5400'-6034' at 50% excess to account for hole washouts and to possibly bring cement inside the 9 5/8", 40# casing to 5000'. We propose waiting on cement 8 hours, then tagging to verify the cement top. ~~Should the cement top be found to be below the 9 5/8" casing shoe at 5400', we propose to set a cast iron bridge plug in the 9 5/8" casing at 5380' and spot 50sx (155') Class "C" neat cement on top of the plug. The well would then be temporarily abandoned for an estimated time period of 100 days to allow Hamon Fed Com A #'s 2H and 4H to be drilled and the completion of an evaluation to determine the best course of action to take on the~~

## CONDITIONS OF APPROVAL

Sundry dated 08/01/2014

<b>OPERATOR'S NAME:</b>	Legacy Reserves Operating, L.P.
<b>LEASE NO.:</b>	NMNM-84651
<b>WELL NAME &amp; NO.:</b>	Hamon Fed Com A 1H
<b>SURFACE HOLE FOOTAGE:</b>	0200' FNL & 1010' FWL
<b>BOTTOM HOLE FOOTAGE:</b>	0330' FNL & 1980' FWL Sec. 07, T. 20 S., R 34 E.,
<b>LOCATION:</b>	Section 18, T. 20 S., R 34 E., NMPM
<b>COUNTY:</b>	Lea County, New Mexico

Legacy's plans to permanently abandon the current open hole wellbore below the 9-5/8" intermediate casing at 5400' is Approved with the following conditions of approval:

**NOTE:** The BLM will not approve a Salt Water Disposal Well within ½ mile radius the current surface location of this well from 5400' to TVD.

The BLM is to be notified in advance for a representative to witness tagging of plug:  
Call the Hobbs Field Station, 414 West Taylor, Hobbs NM 88240,  
(575) 393-3612

1. Operator shall tag top of plug at a minimum of 50' above the 9-5/8" shoe. Tag approximately 5350 or shallower. (it is required to have a shoe plug per on shore orders) Tag to be witness by BLM.
2. Operator has the option of bring the cement plug 150' above the 9-5/8" shoe.
3. The operator shall properly secure the 9-5/8" casing with a minimum of a blind flange and a pressure gage installed.
4. Within 90 days operator shall submit a Sundry to the BLM requesting additional evaluation time and/or a drilling proposal to sidetrack the well or plug the well.
