Surface Use Plan

1. ROAD DIRECTIONS & DESCRIPTIONS (See MAPS 1 - 5)

From Carlsbad...

Go East 32 miles on US 62/180 to NM 176 junction

Then turn right and go Southeast 6.8 miles on paved NM 176

Then turn left and go North 0.9 mile on a caliche road

Then turn right and go East 125' on a caliche road

Then turn left and go Northeast 596.5' on a jeep trail onto the pad

Roads will be maintained to a standard at least equal to or better than their present condition.

2. ROAD TO BE BUILT OR UPGRADED (MAPS 3 - 5)

Approximately 596.5' of jeep trail will be crowned, have a 14' wide driving surface, and be surfaced with caliche. Maximum disturbed width = 20'. Maximum grade = 1%. Maximum cut of fill = 1'. No culvert, cattle guard, or turn out is needed. Existing road upgrading will consist of fixing potholes with caliche.

3. EXISTING WELLS (See MAP 3)

Existing oil, gas, water, injection, disposal, and P & A wells are within a mile.

4. PROPOSED PRODUCTION FACILITIES (See MAP 6)

A tank battery will be installed on the south side of the pad.

5. WATER SUPPLY (See MAP 2)

Water will be trucked from Berry's water station on private land in 2-21s-33e.

6. CONSTRUCTION MATERIALS & METHODS

NM One Call (1-800-321-ALERT) will be notified before construction starts. The topsoil and brush will be stockpiled north of the pad. V door will be to the east. A closed loop drilling system will be used. Caliche will be bought and hauled from an existing approved caliche pit. Dirt contractor will be responsible for caliche.

7. WASTE DISPOSAL

All trash will be placed in a portable trash cage. It will be hauled to a county landfill. There will be no trash burning. Contents of the mud tanks (cuttings, chemicals, salt) will be hauled to state approved disposal sites. Human waste will be disposed of in chemical toilets and hauled to an approved dump station.

8. ANCILLARY FACILITIES

There will be no airstrip or camp. Camper trailers will be on location for the company man, tool pusher, or mud logger.

9. WELL SITE LAYOUT

See MAP 5 and the rig layout diagram for depictions of the well pad, trash cage, access onto the location, parking, living facilities, and rig orientation.

#### 10. RECLAMATION

Interim reclamation will consist of removing caliche from the north 150' of the pad. That area (1.37 acres) will be contoured to a natural shape no steeper than 3:1. Soil and brush will be evenly spread over disturbed areas. Seeded areas will be ripped or harrowed. A BLM approved seed mix will be sown in a BLM approved manner. Enough stockpiled topsoil will be retained to cover the remainder of the pad when the well is plugged. This will leave 63% the pad in use for 4 wells. After the well is plugged, then the remaining 2.3 acres of the pad will be similarly reclaimed. Noxious weeds will be controlled.

#### 11. SURFACE OWNER

All of the pad and the north-most 196.5' of road will be on BLM. The remaining ≈400' roadwork will be on State land for which Diamondback will file a State Land Office road easement application.

#### 12. OTHER INFORMATION

On site inspection was held with Trishia Bad Bear (BLM) on October 23, 2013.

Lone Mountain filed archaeology report NMCRIS 128781 on September 30, 2013.
