JL Isbell Lease

Jal, New Mexico

Well work Xylene Dump

11-1-17

JL Isbell # 8

Scope: Pump Xylene to clean up perfs.

Rig-up pull the rods, tag for fill if we have fill we will come out and go in with a bailer to clean out fill. If there is no fill we will come out of the hole and go back in with a packer testing tubing.

Packer will be set at approximately 3076.

Will be pumping approx. 4 to 10 Gallons of Xylene per perforation and a 10 bbls. of fresh water flush.

The intention is to let the Chemical set over night.

The plan is to make 1 or 2 swab runs, unseat the packer and come out of the hole, lay down the packer and run back in with production tubing, run Rod pump, rods and hang on the Well.
