OTHER: 13. Describe proposed or com		rate, fracture treat, produce d give pertinent dates, including estimated date
13. Describe proposed or com of starting any proposed v	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Co.	d give pertinent dates, including estimated date
13. Describe proposed or com	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Co.	d give pertinent dates, including estimated date
Describe proposed or come of starting any proposed very proposed completion or responsed.	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Co.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of
13. Describe proposed or com of starting any proposed of proposed completion or re 11/23/18 Open well	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Corecompletion.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or com of starting any proposed of proposed completion or re 11/23/18 Open well	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Go	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or com of starting any proposed of proposed completion or re 11/23/18 Open well 11/28/18 to Perforate a 12/05/18 12/07/18 Mill plugs;	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Goand fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or come of starting any proposed or proposed completion or result of the starting any proposed or compression or result of the starting any proposed or completion or result of the starting any proposed or compression of starting any proposed or compression of starting any proposed or compression or result of the starting any proposed or compression or result of the starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Go and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or com of starting any proposed or proposed completion or re 11/23/18	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Goand fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or come of starting any proposed or proposed completion or result of the starting any proposed or compression or result of the starting any proposed or completion or result of the starting any proposed or compression of starting any proposed or compression of starting any proposed or compression or result of the starting any proposed or compression or result of the starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. God and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback. In the state of the state o	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or come of starting any proposed or proposed completion or result of the starting any proposed or compression or result of the starting any proposed or completion or result of the starting any proposed or compression of starting any proposed or compression of starting any proposed or compression or result of the starting any proposed or compression or result of the starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. God and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback. In the state of the state o	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or come of starting any proposed or proposed completion or result of the starting any proposed or compression or result of the starting any proposed or completion or result of the starting any proposed or compression of starting any proposed or compression of starting any proposed or compression or result of the starting any proposed or compression or result of the starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Go and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback.	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or come of starting any proposed or proposed completion or result of the starting any proposed or compression or result of the starting any proposed or completion or result of the starting any proposed or compression of starting any proposed or compression of starting any proposed or compression or result of the starting any proposed or compression or result of the starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or compression or result of starting any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. God and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback. In the state of the state o	d give pertinent dates, including estimated date mpletions: Attach wellbore diagram of od test.
13. Describe proposed or com of starting any proposed or proposed completion or re 11/23/18 Open well 11/28/18 to Perforate a 12/05/18 12/07/18 Mill plugs; 12/10/18 Open well 12/11/18 Well begin	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Gorand fracture treat the Bone Springs formation 9958' - 144. WSI for nearby ops. to flowback. Is to produce.	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
13. Describe proposed or comof starting any proposed was proposed completion or result of the starting any proposed was proposed completion or result of the starting any proposed was proposed completion or result of the starting any proposed was proposed with the starting and proposed was proposed or result of the starting any proposed or result of the starting any proposed or complete any proposed or result of the starting any proposed or result of starting any proposed or complete any proposed or result of starting and sta	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. God and fracture treat the Bone Springs formation 9958' - 144. WSI for nearby ops. to flowback. In the produce.	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
13. Describe proposed or com of starting any proposed or proposed completion or re 11/23/18 Open well 11/28/18 to Perforate a 12/05/18 12/07/18 Mill plugs; 12/10/18 Open well 12/11/18 Well begin	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Gorand fracture treat the Bone Springs formation 9958' - 144. WSI for nearby ops. to flowback. Is to produce.	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
13. Describe proposed or comof starting any proposed with proposed completion or responsed to the proposed completion or responsed completion or responsed completion or response to the proposed completion or response to the proposed completion or response to the proposed completion of response to the proposed completion of the proposed completion of the proposed completion of the proposed completion or response to the proposed completion or re	upleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Concecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. Gorand fracture treat the Bone Springs formation 9958' - 144. WSI for nearby ops. to flowback. Is to produce.	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
13. Describe proposed or comof starting any proposed with proposed completion or responsed to the proposed completion or responsed completion or responsed completion or response to the proposed completion or response to the proposed completion or response to the proposed completion of response to the proposed completion of the proposed completion of the proposed completion of the proposed completion or response to the proposed completion or re	work). SEE RULE 19.15.7.14 NMAC. For Multiple Conversion. SEE RULE 19.15.7.14 NMAC. For Multiple Conversion. To test casing for 30 min to 6281 psi; dropped 98 psi. Gonand fracture treat the Bone Springs formation 9958' - 144. WSI for nearby ops. To flowback. The state of t	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
13. Describe proposed or comof starting any proposed we proposed completion or result 11/23/18 Open well 11/28/18 to Perforate at 12/05/18 Mill plugs; 12/10/18 Open well 12/11/18 Well begin Spud Date:	repleted operations. (Clearly state all pertinent details, and work). SEE RULE 19.15.7.14 NMAC. For Multiple Consecompletion. to test casing for 30 min to 6281 psi; dropped 98 psi. God and fracture treat the Bone Springs formation 9958' - 144 WSI for nearby ops. to flowback. In the state of the second s	d give pertinent dates, including estimated date impletions: Attach wellbore diagram of od test. 44' in 22 stages w/12,806,030 lbs sand.
