			<input checked="" type="checkbox"/> Other Off-Lease Gas Measurement

13 Describe Proposed or Completed Operation (clearly state all pertinent details including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Request for approval of off-lease measurement filed in response to BLM request. Economics associated with low production volume do not justify cost of laying sales line directly to this property. Gas production from this well is approximately 25 mcf/day.

Gas production from the Gulf Federal #1 is routed through on-lease check meter and transported via pipeline to sales point in Section 19-T9S-R38E. Gas is delivered to Versado Gas Processors, LLC at Sawyer Master Meter.

Map showing location of lease and facility is attached.
