13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection)

This well was originally permitted to have a 210' X 300' location with a 160' X 160' reserve pit. Fasken Oil and Ranch would like to eliminate the reserve pit and drill this well with a closed loop fluid system. The location size will be changed to 250' X 250' with no reserve pit. The drilled cuttings and fluid will be hauled off to an approved disposal facility. The closed loop system will consist of 2 frac tanks, a circular settling tank, and 2 roll off cuttings bins. The drilling rig is equipped with fluid holding tanks and a shale shaker. A revised location plat is attached.
