Re: Springs Well No. 1 - Unit H,
Section 11, T-11-S, R-34-E, Lea
County - Conversion for Disposal
Well in the Devonian Formation-
Your letter, November 21, 1968

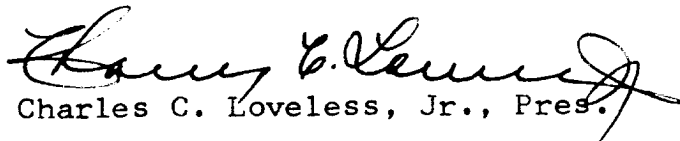

Dear Sir:

This is to advise that subject well was deepened to 13,685' in the Devonian from the previous TD of 13,225'. The well was acidized with 2500 gallons of acid and 13,100 feet of 3- $\frac{1}{2}$ -inch plastic-line tubing installed on a tubing hangar set at approximately 10,000' below the surface.

The well was tested at 15,000 BPD injectivity on a vacuum and put in service for disposal in mid-September, 1968.

If there is additional information we can furnish your office please advise.

Yours very truly,

Charles C. Loveless, Jr., Pres.
