Roswell, New Mexico

Address Box 1757

Company Nearburg & Ingram

I understand that this plan of work must remain in effect until the well is plugged or abandoned.

Permission is requested to drill a 400' San Andres test with the following casing and cementing program:
8-5/8" at 300' with enough sacks to circulate 5-1/2" at total depth with 200 sacks
Casing will be perforated opposite open section and stimulated if necessary.

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casing; indicate mudding jobs, cementing points, and all other important proposed work.)

DETAILS OF WORK

The elevation of the derrick floor above sea level is 4020 ft.
