Well No. 10-9 Trigg is located 1980 ft. from N line and 1980 ft. from E line of sec. 9
NW 1/4 SE 1/4, Sec. 9 14 South 31 East N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Caprock-Queen Pool Chaves New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4158 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill this well to a depth of 2810 feet, with rotary to be used to a depth of 1120 feet, and cable tools from that point to total depth.

Surface casing, 13-3/8", will be run to depth of 90 ft., set in red beds and cemented with 50 sacks.

Intermediate string, 8-5/8", will be run to depth of 1120 ft through red beds and mudded.

The oil string 5-1/2", will be run to a depth of 2790 feet, cemented with 160 sacks.

All casing run and cemented will be under methods approved by the USGS.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
