RE: Form C-103 for Kerr-McGee Corporation's State "E" 7169 Lease, Well #2. Located in Section 36, T13S, R37E. Lea County, New Mexico.

Gentlemen:

Enclosed in triplicate is Form C-103, "Sundry Notices and Reports on Wells", for the State E-7169 #2.

The State E-2 was completed in May, 1957 as a producing oil well from the King Devonian Field. The well had an initial potential of 384 BOPD, by October, 1958 the well had declined to 3 BOPD, 60 BWPD. Due to its uneconomic status the well was shut in. In April, 1959 application was made to temporarily abandon the well. The well was being held as a possible candidate for use as a water disposal. In April, 1984 application was made to permanently plug and abandon the State E-2.

Plugging operations, of the State E-2, began on April 24 and were finished on April 27, 1984. Please note that Tony Plattsmier witnessed the plugging operations on the State E-7169 #2.

Should any additional information be required, please contact me at this office.

Sincerely,

KERR-McGEE CORPORATION
