15. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work.) SEE RULE 1400.

This well is producing 15 EOPD and over 2000 BWPD. Two unsuccessful attempts to reduce water production were made late in 1969. We now propose to P & A the well as follows:

1. Set CRDP in 7" casing @ 11050' and cap w/4 sx cement w/dump bailer.
2. Shoot off and recover 7" casing as deep as possible.
3. Use 84/gallon gel mud and spot these cement plugs:
  - a. 40 sx in and out of 7" stub.
  - b. 40 sx across top of Abo at 7835' (if 7" stub below this point).
  - c. 40 sx across top of Glorieta at 5950' (if 7" stub below this point).
  - d. 40 sx in and out of 9-5/8" shoe at 4645'.
4. Shoot off and pull 9-5/8" casing from about 800-900'.
5. Set 40 sx cement in and out of 9-5/8" stub and 15 sx in top of well.

Shoot dry hole marker, clear and level location.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
