Artesia, New Mexico, Dec. 14, 1936

M. E. Baish

Well No. 8 is located 1980 ft. from [N] line and 660 ft. from [W] line of sec. 21

SW NW 21 17S 32E N M P M  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Maljamar Lea New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4026 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will set 12½" casing at approximately 900 feet which is above the salt. We will set approximately 2300 feet of 10" casing. We will then pull the 12½" casing and cement the 10" casing with 300 cks and mud to the top of the hole. If commercial production is not found at the 2350 foot level, we will carry the well down to the 4100 foot level. If the well is continued to this depth we will set approximately 3750 feet of 6-5/8" casing and cement with 75 cks.

\* See attached sheet for conditions of approval.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Maljamar Oil & Gas Corporation

Address Artesia, New Mexico
