

III. Potential Hazards:

- A. What equipment or activity associated with the structure may possibly create electrical interference with radio communications between airport and aircraft:

none

- B. What equipment or activity associated with the structure may possibly make it difficult for flyers to distinguish between airport lights and others:

none

- C. What equipment or activity associated with the structure may possibly result in glare in the eyes of flyers using the airport or impair visibility in the vicinity of the airport:

none

- D. What equipment or activity associated with the structure may possibly endanger or pose any risk to the landing, take-off or maneuvering of aircraft at the airport:

none

- E. Other potential hazards to aircraft and/or airport operations posed by the structure or activities associated with structure:

none, unless to an extremely low-flying aircraft

IV. Construction of Structure:

- A. Dates construction will commence and end: 3/20/01 - 5/1/01

- B. Will an existing structure be changed by construction: no

If so, give information requested under II(B) through II(D) for the existing structure:

n/a

- C. Construction hazards to aircraft operations:

n/a
