(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

May 13, 1953

Well No. 5 is located 990 ft. from N line and 1650 ft. from W line of sec. 33

SW NE NW Sec. 33 17S 33E NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Maljamar Lea N. Mex.
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We wish to top this well in with a rotary, setting approx. 1300 ft. of 8 5/8" casing for surface string. From that point on the well will be completed with cable tools to about 4300 ft., where the Maljamar pay is expected. Approx. 4,000 ft. of 7" casing will be run for oil string.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Barney Cockburn
