THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. THE EARTH AND ITS HISTORY

SECTION I. THE EARTH AND ITS HISTORY

The earth is a sphere, and its history is the history of the changes which have taken place in its form and position since its origin. The history of the earth is divided into three periods: the primary, the secondary, and the tertiary. The primary period is the period of the origin of the earth, and the secondary period is the period of the development of the earth.

SECTION II. THE EARTH AND ITS HISTORY

The earth is a sphere, and its history is the history of the changes which have taken place in its form and position since its origin. The history of the earth is divided into three periods: the primary, the secondary, and the tertiary. The primary period is the period of the origin of the earth, and the secondary period is the period of the development of the earth. The tertiary period is the period of the present day, and it is the period of the changes which have taken place in the earth since the secondary period.

SECTION III. THE EARTH AND ITS HISTORY

The earth is a sphere, and its history is the history of the changes which have taken place in its form and position since its origin. The history of the earth is divided into three periods: the primary, the secondary, and the tertiary. The primary period is the period of the origin of the earth, and the secondary period is the period of the development of the earth.

The tertiary period is the period of the present day, and it is the period of the changes which have taken place in the earth since the secondary period. The history of the earth is divided into three periods: the primary, the secondary, and the tertiary. The primary period is the period of the origin of the earth, and the secondary period is the period of the development of the earth.

SECTION IV. THE EARTH AND ITS HISTORY

The earth is a sphere, and its history is the history of the changes which have taken place in its form and position since its origin. The history of the earth is divided into three periods: the primary, the secondary, and the tertiary. The primary period is the period of the origin of the earth, and the secondary period is the period of the development of the earth.
