Saunders "A"

March 5th 1957

Well No. 1 is located 500 ft. from ~~NY~~ ^{NI} line and 1230 ft. from ~~W~~ ^W line of sec. 19....

19S (Twp.)	33E (Range)	N14PM (Meridian)
Wildcat (Field)	Lea (County or Subdivision)	New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3625 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The hole being full of mud, we will set a cement plug from 1210' to 1270'. We will then cut the 3 5/8" casing at approximately 500' and pull. We will then set a cement plug at 55 feet and fill the hole to the top, placing a 4-inch marker (pipe) at the top of the cement. We will then clean the location and leave the ground in its original condition.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
