In re: NM OCC Order No. R-1158 - Santa Fe No. 18

✓ New Mexico Oil Conservation Commission  
P. O. Box 2045  
Hobbs, New Mexico

Gentlemen:

As authorized by the subject order, our Santa Fe No. 18 has been dually completed as outlined in our Case No. 1415.

We have complied with all provisions of the subject order and are attaching the following:

1. Form C-103 - Miscellaneous Report on Wells.
2. Form C-104 - Request for Oil Allowable.
3. Form C-110 - Certificate to Transport Oil and Natural Gas.
4. Form C-116 - Gas-Oil Ratio Report.
5. Form C-124 - Bottom Hole Pressures.
6. Diagrammatic Sketch of Mechanical Installation.
7. Packer Leakage Test (with charts).
8. Two copies of Radioactive Log.

It will be noted that a Form C-122 is not included as requested in the order since the two zones involved are not gas zones.

This will also advise that positive displacement meters are installed so as to separately measure production from both zones involved prior to commingling. As directed in Mr. A. L. Porter's letter of May 2, 1958, the meters will be calibrated at monthly intervals and a report filed with the Commission.

Yours very truly,

PHILLIPS PETROLEUM COMPANY
