AMENDED SURFACE LOCATION OF  
WATER INJECTION WELL  
MOBIL PRODUCING TX. & N.M. INC.  
BRIDGES-STATE LEASE  
WELL #186  
CASE NO. 7866, ORDER R-7361  
VACUUM (GRAYBURG-SAN ANDRES) POOL  
LEA COUNTY, NEW MEXICO

Gentlemen:

MPTM requests authorization to amend this injection well location and maintain reporting responsibility for this well to the NMOCD. The reason for this request is because this well was inadvertently drilled 9' south of the permitted location on MPTM's Bridges State Leases and 6' inside Conoco's State H-35 Lease.

This injection well was initially permitted by order R-7361, Case #7866 and drilling permit form C-101. A cooperative Water Injection Agreement and amendment letter dated 16 Dec 83 between Conoco and MPTM agree to the well's present location and purpose. On 16 Dec 83, S. D. Marino received verbal approval from R. L. Stamets to complete the well when the well was discovered to be in a non-permitted location. On 9 Jan 84, J. T. Sexton, NMOCD District 1 Supervisor, verbally stated to S. D. Marino that he had no objection to MPTM maintaining the reporting responsibility for this well despite the fact the well was located on Conoco's lease. From both conversations, MPTM understands that the details of this matter might have to be heard at a hearing.
