## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

6-5/8" 20# New Electric welded casing was set in this well at 3808' and cemented by the Halliburton Method with 100 sacks of cement.

Casing and fittings were tested with 1200# pump pressure and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the cement was then drilled out of casing and the same test of 1200# again applied and allowed to stand undisturbed for thirty minutes. No drop in pressure resulted so the drilling was then resumed.
