Reed A-3 No. **14** Hobbs, New Mexico July 8, 19**57**

Well No. **14** is located **660** ft. from **DEPT** line and **2310** ft. from **E** line of sec. **3**
SE/4 Section 3 **20S** **36E** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blumont **Lee** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to a total depth of approximately 4000' with rotary tools in an attempt to obtain commercial production in the Queen. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following pattern: 8 5/8" casing to be set at 325' and cemented with approximately 250 sacks cement, cement to be circulated; 5 1/2" casing to be set at total depth and cemented with 1,255 sacks cement, or as determined by survey, and to be perforated opposite the pay zone.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent data collection procedures and the use of advanced analytical techniques to derive meaningful insights from the data.

3. The third part of the document focuses on the implementation of data-driven decision-making processes. It describes how the organization uses the insights gained from data analysis to inform strategic planning and operational decisions, leading to improved performance and efficiency.

4. The fourth part of the document discusses the challenges and risks associated with data management and analysis. It identifies key areas such as data security, privacy, and quality, and provides recommendations for mitigating these risks.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It reiterates the importance of a data-driven approach and provides a clear roadmap for the organization to follow in order to maximize the value of its data.

6. The final part of the document includes a list of references and a glossary of terms. The references provide additional resources for further reading, while the glossary helps to clarify any technical or industry-specific terminology used throughout the document.
