

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

MEMORANDUM FOR THE RECORD

On the subject of the proposed experiment on the synthesis of a new compound, the following information is being furnished for your information:

The proposed experiment involves the reaction of a mixture of reagents under conditions which have not been previously reported.

The results of the preliminary work indicate that the reaction proceeds in a manner consistent with the proposed mechanism.

The following table shows the results of the preliminary work on the reaction of the reagents under various conditions.

Run	Reagents	Conditions	Yield (%)
1	A, B, C	100°C, 2h	85
2	A, B, C	120°C, 2h	90
3	A, B, C	140°C, 2h	88
4	A, B, C	160°C, 2h	82
5	A, B, C	180°C, 2h	78

The above results show that the reaction proceeds in a manner consistent with the proposed mechanism. The yield of the product is high and the reaction is reproducible.

The following table shows the results of the preliminary work on the reaction of the reagents under various conditions.

3/15/54

The following table shows the results of the preliminary work on the reaction of the reagents under various conditions.

The above results show that the reaction proceeds in a manner consistent with the proposed mechanism. The yield of the product is high and the reaction is reproducible.
