*also what
quantity is
flared?*

Gentlemen:

As reflected by our Forms C-104 and C-110, our New Mexico State E-2, Unit "M", located in SW 1/4 of SW 1/4 of Sec. 10, T-19-S, R-37-E, was completed June 15, 1956, as an oil well from the Sumont Pool.

We were notified by Mr. A. L. Porters, Jr.'s letter, dated July 25, 1956, that in order to comply with order R-553 we must either contain a connection for the sale of the casing head gas from our well or secure the exception from the "no flare" order prior to September 15, 1956.

60 days

Gas contract with Warren Petroleum Corporation to take the gas from this well is being negotiated and we expect them to connect and start taking gas from this well sometime in the near future.

10/4/56

thru

10/3/56

In view of these facts, we respectfully request that Humble Oil & Refining Company be granted a ninety-day exception to the "no flare" provisions of the Sumont pool rules so that we might continue producing from this well.

Your early consideration of this matter will be appreciated.

Yours very truly
HUMBLE OIL & REFINING COMPANY
