Place

Date

OIL CONSERVATION COMMISSION,  
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intentiton to do certain work as described below at the \_\_\_\_\_

Amerada Petroleum Corporation Larsen Well No. 2 in NE 1/4 NW 1/4  
Company or Operator Lease  
of Sec. 32, T. 19, R. 37, N. M. P. M., Monument Field,  
Lea County.

## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

12 1/2" 40# 8-Thd. New Lap Weld casing was set in this well at 200' and cemented by the Halliburton Method with 200 sacks.

Cement will be drilled out of the casing and the hole will be bailed dry and allowed to stand undisturbed for one hour. The bailer will then be run to bottom again to determine if any water has accumulated. If no water has accumulated the drilling will then be resumed.

DUPLICATE

Approved \_\_\_\_\_, 19\_\_\_\_

## THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the processes which have shaped the earth and its features.

### THE EARTH AND ITS PARTS

The earth is a sphere which is divided into four main parts: the crust, the mantle, the core, and the atmosphere. The crust is the outermost layer, the mantle is the layer below the crust, the core is the innermost layer, and the atmosphere is the layer of gases which surrounds the earth.

The crust is the part of the earth which we live on. It is made of rocks and minerals. The mantle is the layer below the crust. It is made of molten material. The core is the innermost layer. It is made of molten material. The atmosphere is the layer of gases which surrounds the earth.
