Salsich, McGrath & Smith  
331 Pet. Life Bldg.  
Midland, Tex.

Gentlemen:

Form C-103 on your Gulf-State Well No. 2-0 in Section 1, T-20-S, R-37-E is still incomplete. The "Results of Test of Casing Shut-Off" are not shown.

Rule 107 of the Commission Rules and Regulations paragraph (b) states that "cement shall space behind the surface casing" and "shall stand cemented for 24 hours before drilling plug or initiating tests". Your C-103 does not state how long you waited before pressure testing or that you tested at all. It is required by the State that the fresh water sands of the Lea County Water Basin be adequately protected.

Yours very truly,

OIL CONSERVATION COMMISSION

HOBBS NEW MEXICO

NOV 19 1917

TO THE  
HONORABLE  
COMMISSIONER OF THE  
LANDS

WASHINGTON

Dear Sir: I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the proposed oil conservation commission. I am very glad to hear that you are interested in the conservation of our oil resources. I am sure that the commission will be able to do much to conserve our oil resources and to develop them in a wise and economical manner. I am sure that the commission will be able to do much to conserve our oil resources and to develop them in a wise and economical manner. I am sure that the commission will be able to do much to conserve our oil resources and to develop them in a wise and economical manner.

Very truly yours,

WILLIAM H. HARRIS

W. H. Harriss

Gentlemen:

We are returning Form C-103 for your Gulf State No. 2 in Unit O of Section 1, T-20-S, R-37-E due to the lack of information given.

Before returning it, please show the amount of pipe and setting depth, whether or not the cement circulated and the test pressure.

Yours very truly,

OIL CONSERVATION COMMISSION
