## DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

In compliance with Rule 402, Rules and Regulations of the New Mexico Oil Conservation Commission, the shut-in pressure of this well was found to be 1067 p.s.i. gage. This pressure was taken with a deadweight gauge.

(This well was shut-in on March 2, 1951 at the request of the Warren Petroleum Corporation's Monument Gasoline Plant because it started making oil and was going sour. It has remained shut-in thereafter.)
