Mr. **T. A. Staneliff, State Inspector** Hobbs N. Mex. **Dec. 17th 1931**
~~State Geologist~~
Hobbs Sanitorium, New Mexico.

Following is a report giving the results of work done as indicated above at **Byers**

Well No. **8** in **NE $\frac{1}{4}$** of Sec. **4** T. **19 S** R. **38 E**,
N.M.P.M., **Hobbs** Oil Field **Lea** County.

DETAILS

State names of and expected depths to objective sands or producing horizon; show sizes, weights, and lengths of casing run or proposed; indicating mudding jobs, cementing points, water horizon, number of days operated, and total depth at end of month, and other important information.

8-5-8" casing cemented at 3950' - 6' cement plug in pipe was drilled out and 2' new hole drilled below pipe.

Started bailing hole for water shut-off test, after bailing to depth of 1500', well showed signs of starting to unload and in order to avoid a serious blow-out, fluid was allowed to stand at 1500' for 2 hours. There was no raise in fluid level during the 2 hour test -

Approved **December 18 1931**
