Bordages No. 3

November 27, 1979

Page 2 of 3

6. Source of Construction Materials: Caliche located in SE/4 NE/4 Section 9, T-19-S, R-37-E. Surface and minerals are privately owned. This pit is approximately three miles south of Monument, New Mexico by State Hwy 8, east. (See Attachment No. 1).
7. Methods for Handling Waste Disposal:
 - A. Reserve pit will be lined and used for cuttings and drilling fluids- reserve pit and trash pits will be fenced.
 - B. All produced fluids oil and water while completing, will be caught in reserve pit or 500 bbl. test tank.
 - C. Hole for sewage will be drilled.
 - D. Trash pits for garbage and other waste materials will be dug on each side of reserve pit. Pits will be fenced and constructed to bury any material 24 inches under the surface.
 - E. After rig moves - area will be cleaned up. Will let reserve pit dry up before breaking out. After breaking out, the location will be cleaned and levelled and restored to original condition insofar as possible.
8. Ancillary Facilities: None are required.
9. Wellsite Layout: See Attachment No. 3
10. Blowout Preventer Assembly: See Attachment No. 4.
11. Plans for Restoration of Surface: All pits will be backfilled, the location cleaned and levelled and restored to original condition insofar as possible.
12. Archaeological Clearance Report: Attached.
13. Lessee's or Operator's Representative: GWDC Representative -
M. B. Myers, telephone number 915/682-5241
509 North Loraine
Midland, Texas 79702
14. Certification:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Great Western Drilling Company and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
