Re: West Pearl Queen Unit #193  
Lea County, New Mexico

Michael:

Due to the above referenced well being too close to the quarter quarter section and also on a fenceline we have staked this well at a new location.

100' FSL 2630' FWL, Sec. 28, T19S, R35E

We believe that this location should satisfy all requirements.

Should you have more questions please call.

Sincerely,

Bonnie Atwater  
Production Technician

*RE: Administrative application for 4 unorthodox  
oil well locations, West Pearl Queen Unit  
Well No. 193, 10' FSL - 2640' FWL, 28-  
T19S-R35E, NMPM, Lea County, New  
Mexico.*

Dear Ms. Atwater:

I am unable to administratively approve the subject well location at this time. Ordering Paragraph No. (2) of Division Order No. R-2729, as amended, requires that a well within a secondary recovery project be at least 5 feet from any interior quarter-quarter section line; the No. 193 well is on the quarter-quarter section line between the SE/4 SW/4 and SW/4 SE/4 of said Section 28.

If possible, could this location be moved to satisfy the requirements? If not, this location will unfortunately require a hearing before authorization by this Division can be made.'

I will hold this well from any action the Division takes on this matter until I hear from you.

Sincerely,

A handwritten signature in cursive script, appearing to read "Michael E. Stogner".
